North West London, UK

ERA MULLAHASANI DULA

SOFTWARE DEVELOPER (3RD YEAR STUDENT)

OBJECTIVE

Software developer (undergraduate) seeking to gain experience and as a results-driven individual, I am looking for work which encourages me to utilise my problem-solving skills and learn more along the way.

PROJECTS

YUML-EDITOR

(2022)

(Web application)

- A web application which is an editor for UML diagrams. Diagrams can be created using yUML's syntax through textual input, then edited also via the GUI screen if desired.

Technologies used: React, Javascript

PERSONAL WEBSITE

(2021)

(Web application)

- An individual project which showcases me and my abilities through a web application.

Technologies used: JavaScript, HTML, CSS, React

SNAPSENSE

(2021)

(Web application)

- A team project which involved directly working with a client to build a web app for hospitals which enables easy communication between doctors and their patients.

Technologies used: JavaScript, SQL, HTML, CSS, React

AIRBNB-LIKE APPLICATION

(2020)

(JavaFX application)

- This was a team project which resembled an Airbnb like desktop application which the user could browse through properties in all boroughs of London.

Technologies used: JavaFX, SceneBuilder, Google's API

PROGRAMMING SKILLS

Java, Python, SQL, HTML, CSS, JavaScript.

ACTIVITIES

- I attended a cyber-security workshop hosted by my university
 - involved solving numerous problems to exploit the data given.
- I participated in a programming competition held by my university
 - involved completing a series of challenges from HackerRank against time and opponents.
